

More than 640,000 tons of fishing gear are disposed in our oceans every year: the same weight as **100,000 BUSES**

The prevalence of fast fashion accounts for 10,000 items of clothing being sent into landfills **EVERY FIVE MINUTES**

481.6 billion plastic bottles are used worldwide, and in a single year **\$1 BILLION** worth of plastic is wasted

This doesn't have to be our children's future
This KOMPAN playground was made from ocean waste, textile waste, post-consumer recycled plastic bags, and even medical waste.

KOMPAN has made it our responsibility to create environmentally-friendly play spaces where kids can play for decades to come. Modern recycling methods now allow the tons of trashed fishing nets, used textiles, food packaging waste, plastic bags, and other materials cluttering our landfills to be recycled in various ways, including children's playground equipment.

LET'S CREATE HEALTHIER & HAPPIER COMMUNITIES...

Full-circle Solutions

KOMPAN solutions

Secondary raw materials

Collect waste sources

Sorting of waste

Rotomolded components for products are made from 25% post-consumer ocean recycled waste.

All Robinia and pine wood are sourced from sustainable forestry.

All catalogs and brochures are printed on sustainable, FSC®-certified paper.

All platform floors for Moments™ & Giants™ are 75% recycled ocean waste.

... IN A SUSTAINABLE WAY

MADE GREEN

ECOCORE™ PANELS

EcoCore™ HDPE have a core made from 100% post-consumer materials from food packaging waste.

EXTRUDED ALUMINUM

Parts and fittings are made using low-carbon processes.

TEXMADE™

Posts are made from 100% post-consumer recycled textile and plastic waste.

OCEAN GREEN

Dark teal panels are made from 100% post-consumer ocean recycled waste.
