Plywood Composite

Plywood Composite Modular Pumptracks using our proprietary reinforced fibreglass high grip riding surface are strong enough to be installed permanently in public spaces, yet light enough to be transported to events.

This flexibility makes plywood composite tracks ideal for attracting crowds to public events such as festivals, family fun days, and fundraisers.

Parkitect's original and most versatile product, plywood composite structures have proven their durability in the harshest environments: from the deserts in Dubai, to the snow of the French Alps. Top quality timber is cut and treated to protect against water and insects and all fasteners are rust proof.

Engineered for long life, low maintenance and high grip, our plywood composite tracks have a proprietary non-slip riding surface, use ecological resins and paints, and are fast and simple to install.

Key features:

- Excellent for attracting crowds to events or reactivating spaces
- Fast and simple to install by non-specialised trades
- Super cost effective - install around existing infrastructure and landscaping
- Proprietary reinforced fibreglass high grip riding surface
- 17mm premium exterior grade European Birch film faced plywood
- Stainless steel and galvanised strengthening components
- Stainless steel and zinc anodised hardware
- Ecological resins and paints

The PARKITECT difference

Riding Surface

Made from woven GFRP with all weather grip, our riding surface is durable, repairable, and suitable for all wheels. It is attached from the sides and the bottom to avoid protruding screw hazards.

Smooth Edges

Our edges are smooth and round to avoid scrapes on skin and paint.

Rubber Feet

Every module sits on moulded rubber pads keeping the wood frame off the ground and allowing it to breathe.

Hidden Hardware

All of the assembly hardware is neatly hidden under the riding surface for both rider safety and security.

Stainless Steel

We use high quality stainless steel for all assembly hardware and all exposed reinforcement components.

Guaranteed riding result
with proven geometry

Aesthetically pleasing riding
play-space for public areas

Proven track design for
rider safety & enjoyment

Riding Surface

Made from woven GFRP with all weather grip, our riding surface is durable, repairable, and suitable for all wheels. Each module is one single piece of fibreglass.

Geometry

Fully revised geometry, with a 1200mm area for riding, slightly concave design to keep riders in the track centre, large rounded edge design with optional colour highlight

Hidden Hardware

All of the assembly hardware is neatly hidden under the riding surface for both rider safety and security.

Rubber Feet

Every module sits on moulded rubber pads keeping the steel frame off the ground.

All new All FIBREGLASS

The new all Fibreglass Modular Pumptrack is the ultimate in design and material for optimum riding safety and fun.

Parkitect's 'Park Edition' of the Modular Pumptrack system is made using GFRP (glass fibre reinforced polymer) with a proprietary high grip riding surface and a tubular steel frame.

Tracks can be assembled easily above-ground. A highly-resilient type of pumptrack material, composite fibreglass offers the best performance when it comes to harsh weather conditions and heavy-use. Parkitect modules are pre-engineered, designed and certified to guarantee the perfect riding geometry for a superior pump track experience.

The Modular Pumptrack, Park Edition is a patented product and complies with Australian & European Standard AS EN 14974:2021.

Fibreglass Modular Pumptracks offer significant advantages over other designs. Firstly, the aesthetic quality is outstanding. The design of this pump track is sleeker, rounder and lower to the ground. It's 30% wider than our earlier modular pump track designs and the hidden hardware means it's safer from vandalism and safer for users.

The Modular Pumptrack design process is fast and free. This can save you \$30,000 or more on consultation fees, not to mention the time you'll save on the design process.

The all Fibreglass - Park Edition Modular Pumptrack system remains mobile throughout its lifetime. Tracks can be changed, upgraded or removed anytime. It really is the most environmentally-friendly choice in pump track play equipment available world wide.

Key features:

- Complies to new standards AS EN14974:2021
- Simple assembly by non-specialised trades
- Super cost effective - install around existing infrastructure and landscaping
- Easy to landscape
- Proprietary reinforced fibreglass high grip riding surface
- Choose from standard track layouts or have a track designed just for you
- Ecological resins and paints
