

“ Dry solar toilets for eco-friendly dehydration ”

**NIX** : Derived from the English expression, removed, taken away, cleared.

**XI** : The symbol for Xenon, an element that can be used in a solar lamp, is Xi.

**LOO** : English expression for 'sanitaire, toilette’

 The swirling circle represents the circulation and evaporation of water and air

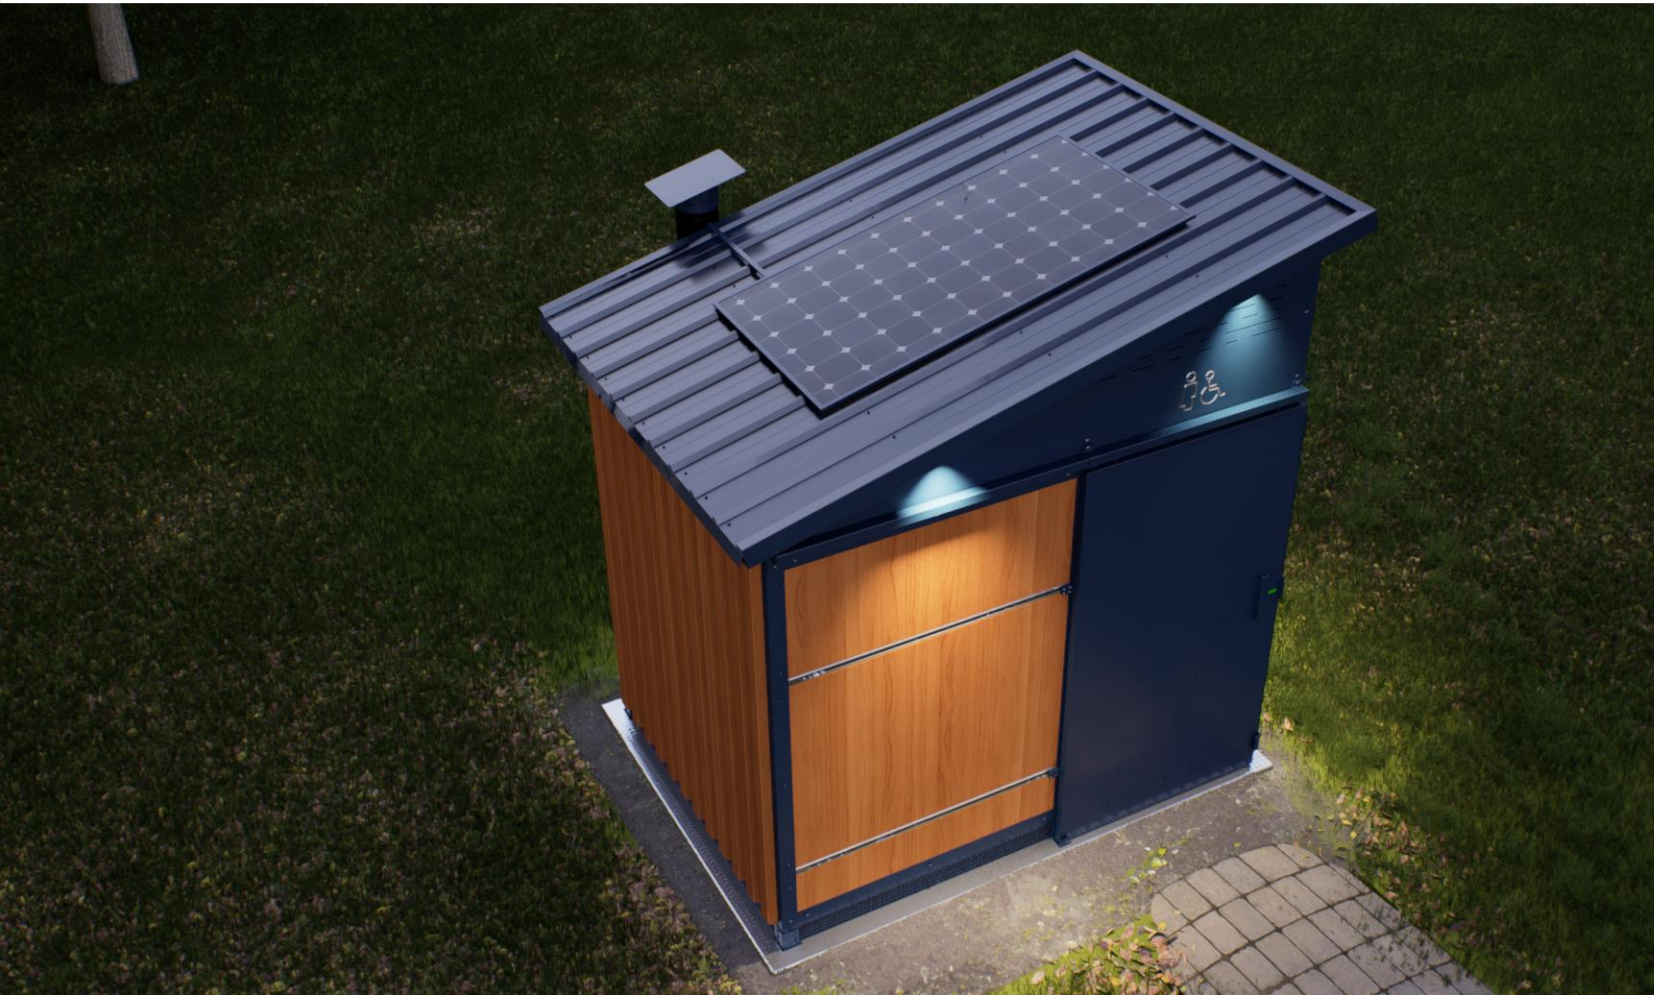

NIX-01

- Constructed to Canadian standards B651-18 for persons with reduced mobility
- Hermetic/non-subject to NSF/ANSI 41 Q-2,r,22 environmental compliance
- Sliding door for easy access

NIX-01

- Stainless steel trash can with lid
- Sturdy stainless steel support bar
- Anti-vandal ergonomic seat

NIX-01

- Solar panel
- Forced and continuous ventilation during day time
- Integrated LED light with automatic ignition

NIX-02

- Solar Panel
- Galvanized steel with baked paint
- Outdoor LED for the evening

NIX-02

- Rot-resistant
- Non-flammable
- Moisture-resistant

NIX-02

- Solar panel
- Battery
- Built-in LED light with automatic ignition

NIX-02

- Vermin protection grid
- Allows the entry of necessary air
- Brings in light indoors

NIX-03

- Toilet connected to the water supply network (optional)
- Unlimited waste capacity
- Self-cleans with high-pressure water jet

NIX-03

- Double toilet (for both people with reduced mobility and regular use)
- No need for foundation
- Integrated LED light with automatic ignition

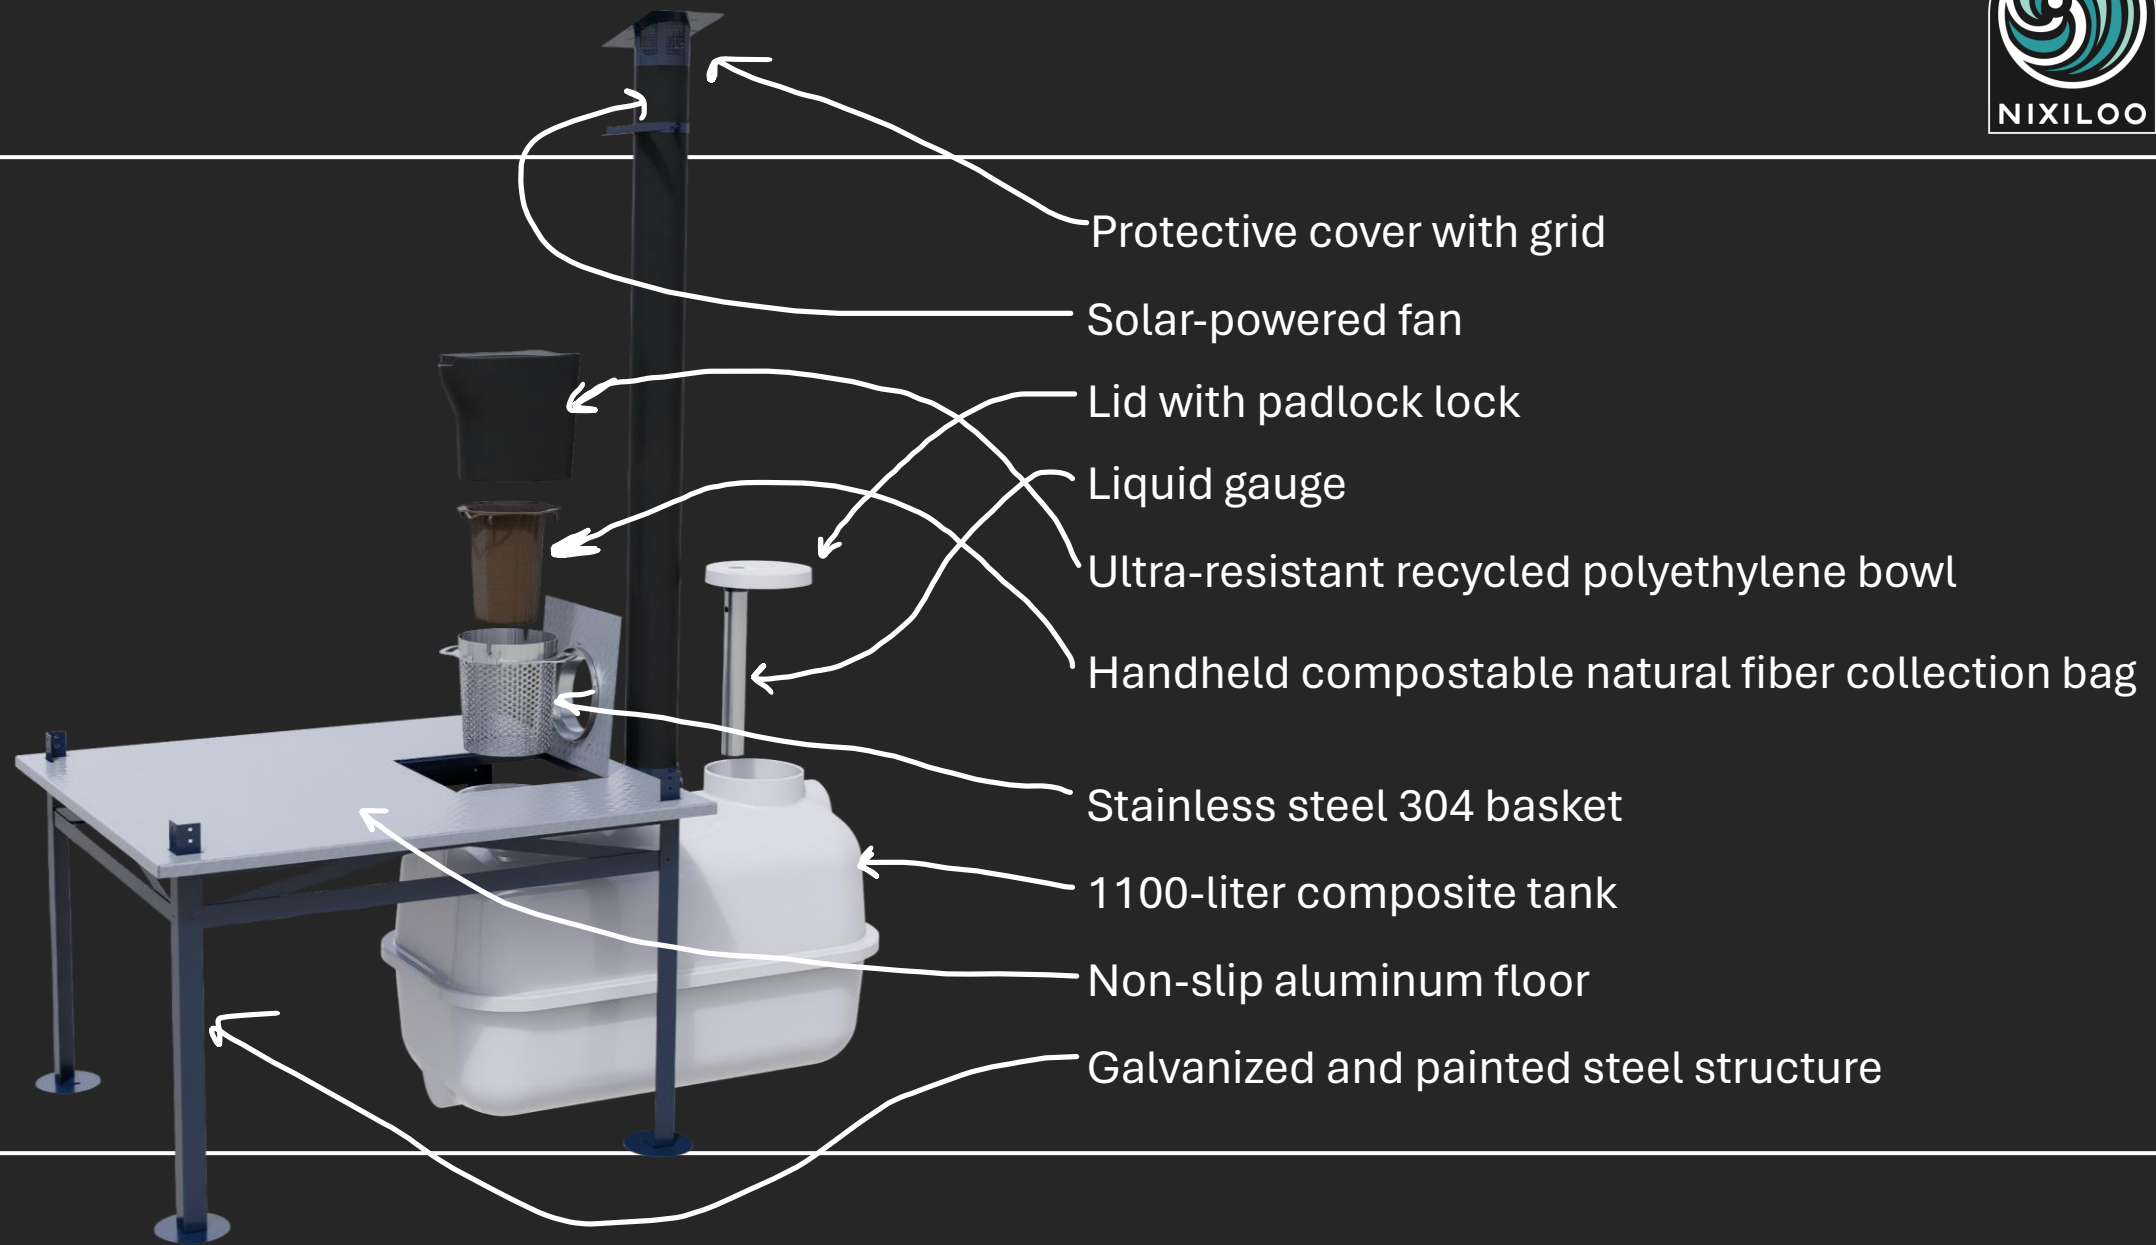

NIX-03

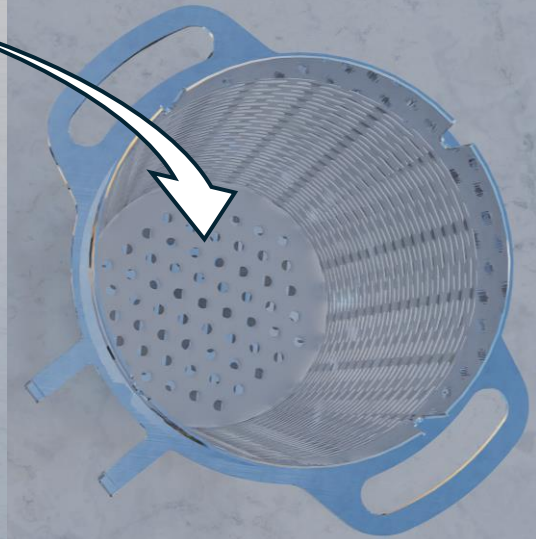

- Stainless steel bowl
- Aid bar, stainless steel trash can, and coat hook
- Non-slip aluminum floor

packaging

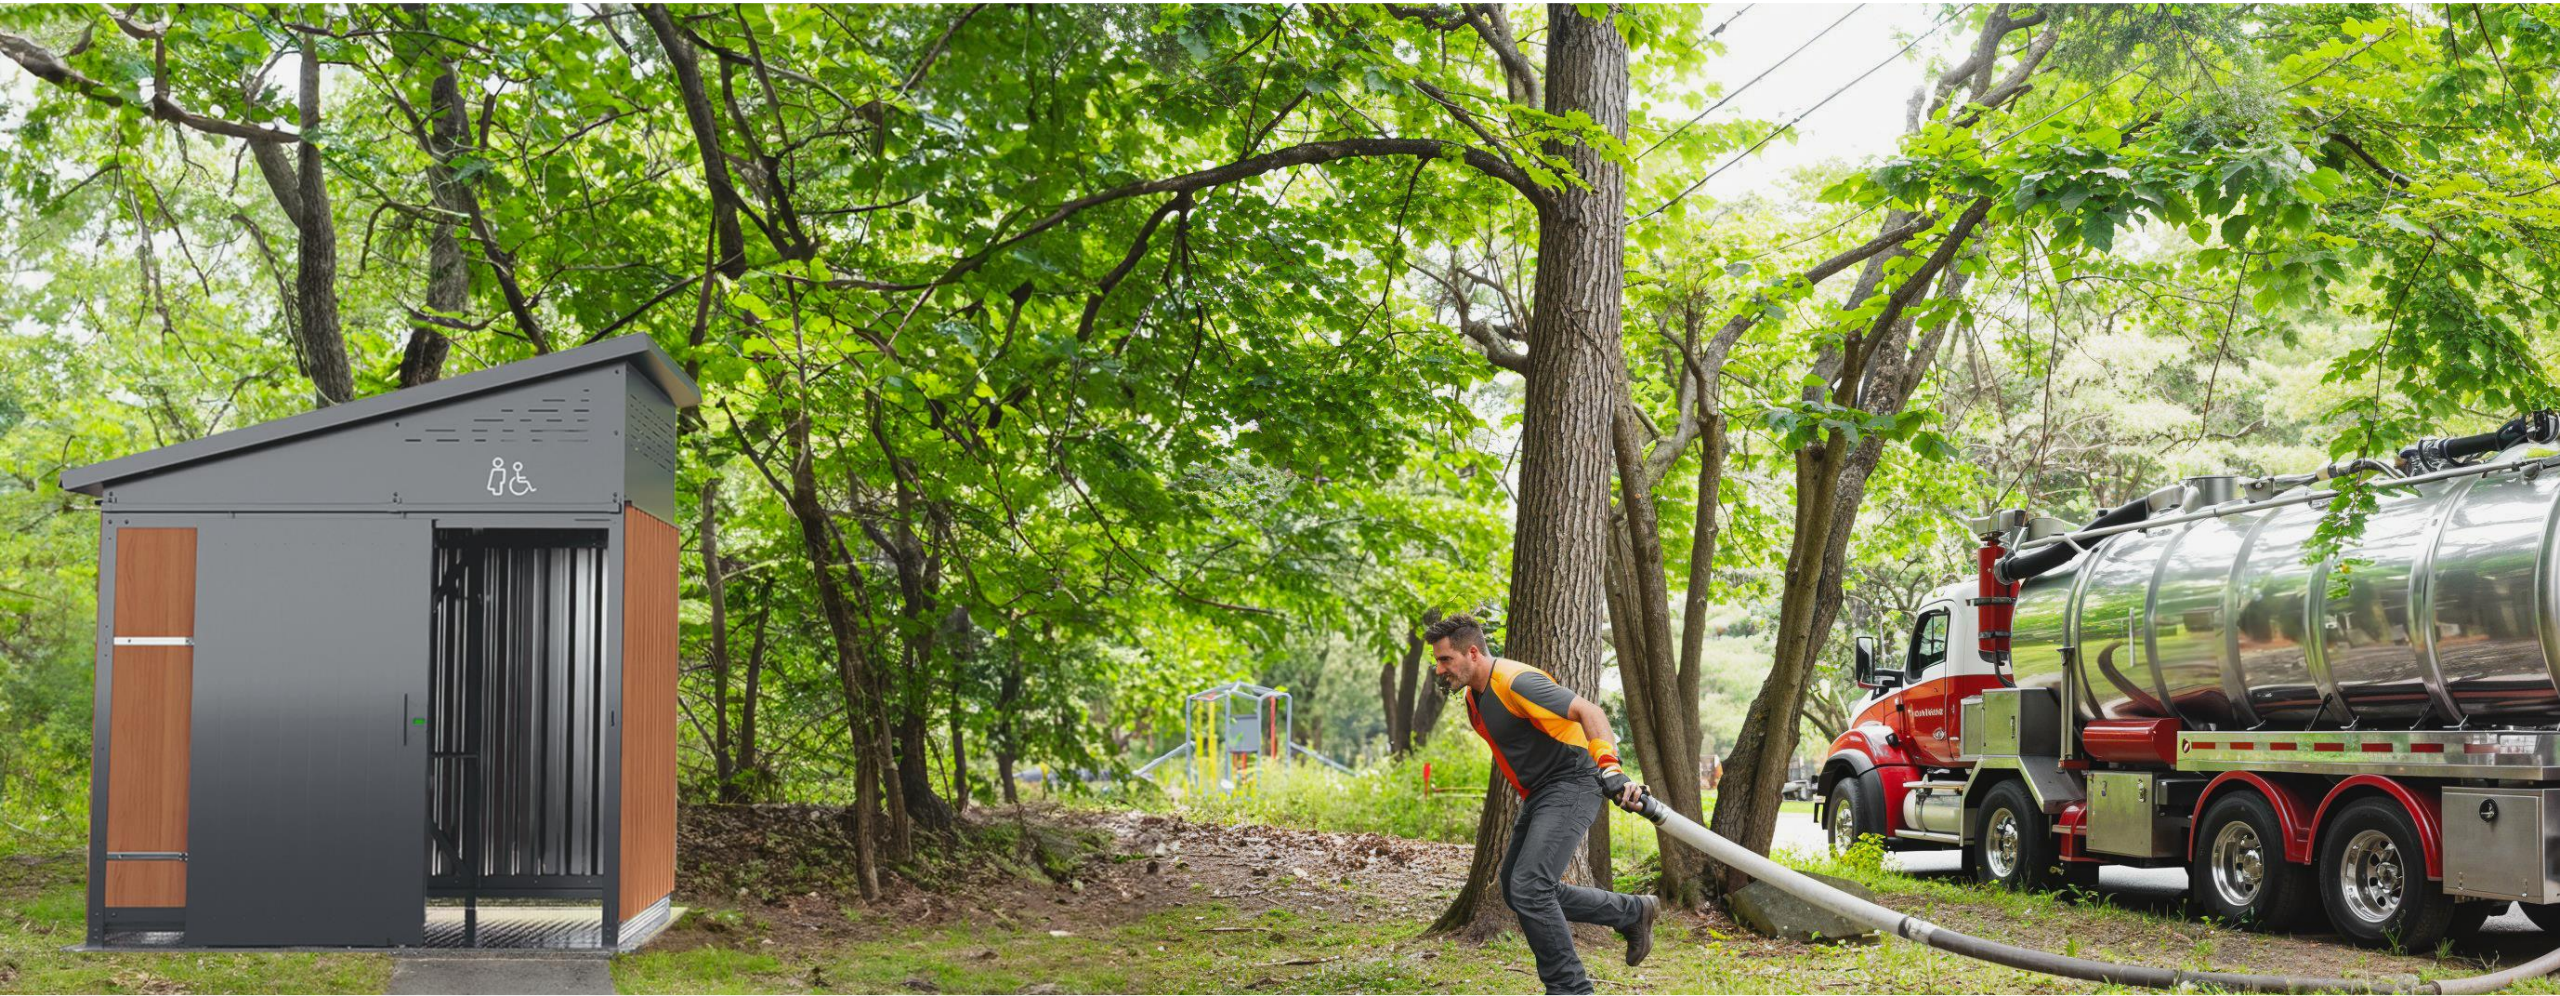

- Maximized transport in a container
- 10 complete Nixiloo units with tank, foundation, and solar panel
- The boxes stack easily for storage

Stainless steel baskets

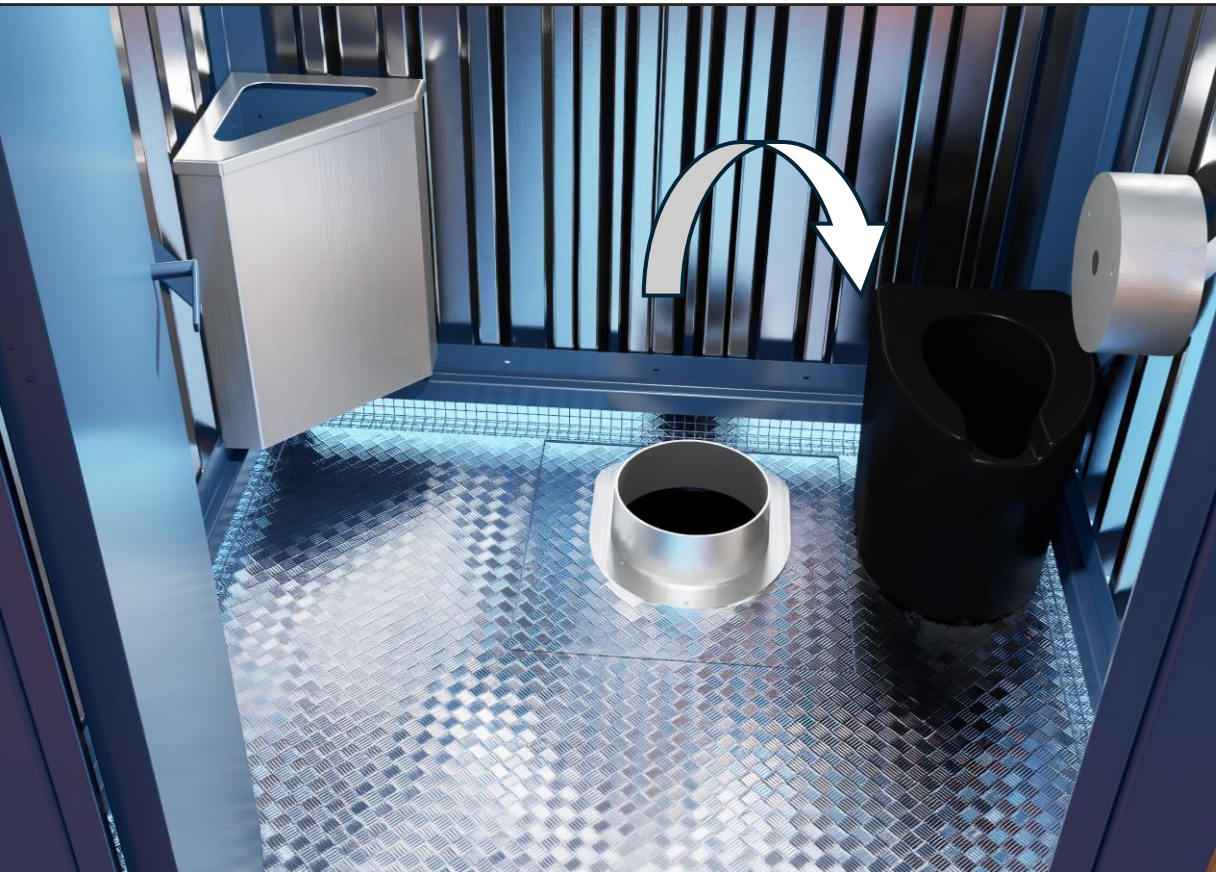

- Small basket with a large opening for manual collection
- Large basket with a small hole for pump-assisted collection
- UHMW bottom to reduce ice adhesion in winter

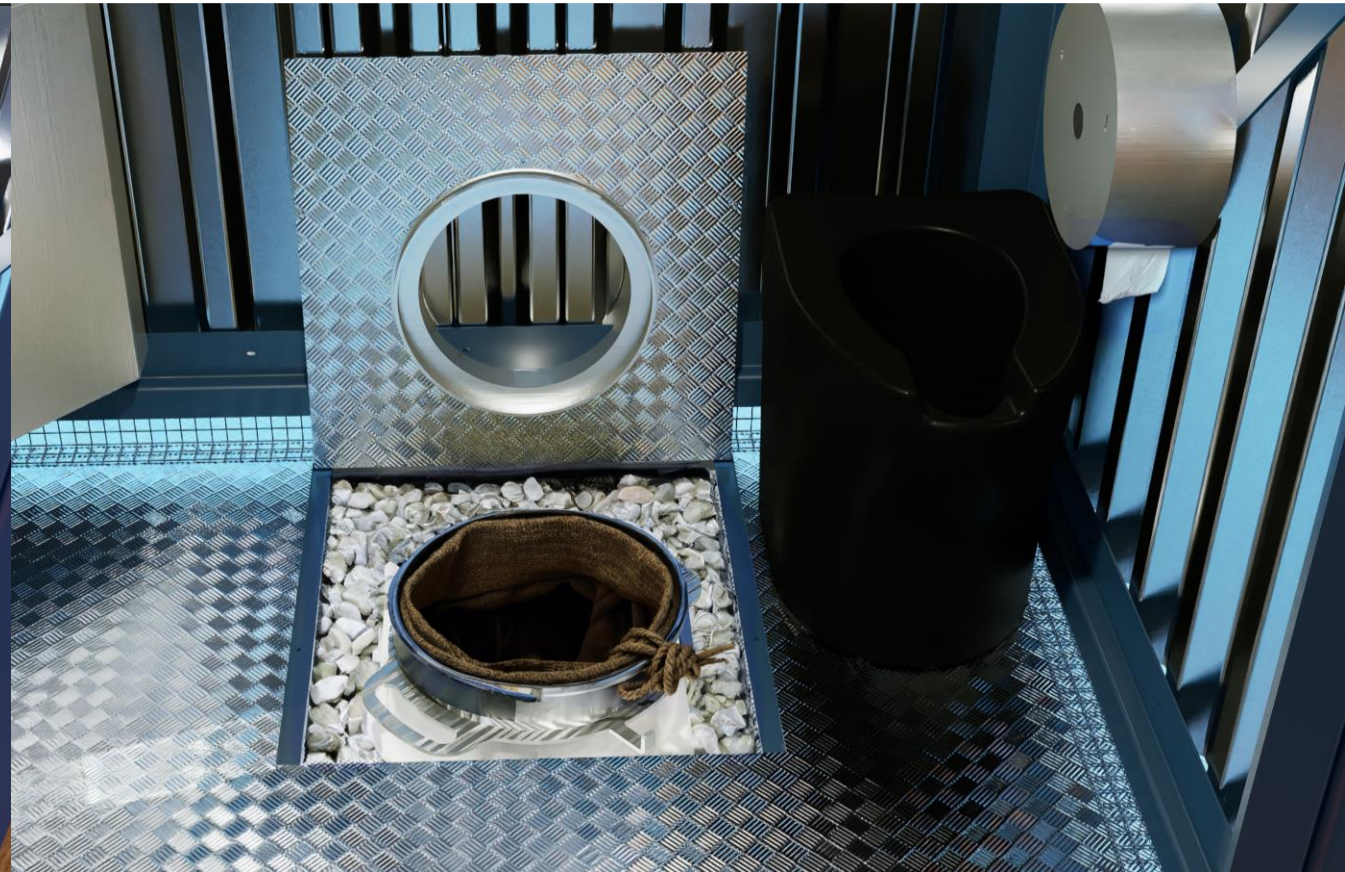

Collection  
**OPTION 1**

- Empties quickly through a pump truck
- Easy access
- Low-cost maintenance as only solids are collected

- Step 1: Remove the bowl

- Step 2: Lift the door to the floor and remove the bag

## Collection OPTION 2

- Maximum bag weight of 45 lbs
- Easy access
- Easy to maintain

Accessories

- Step 3: Place the bag in the transport bucket

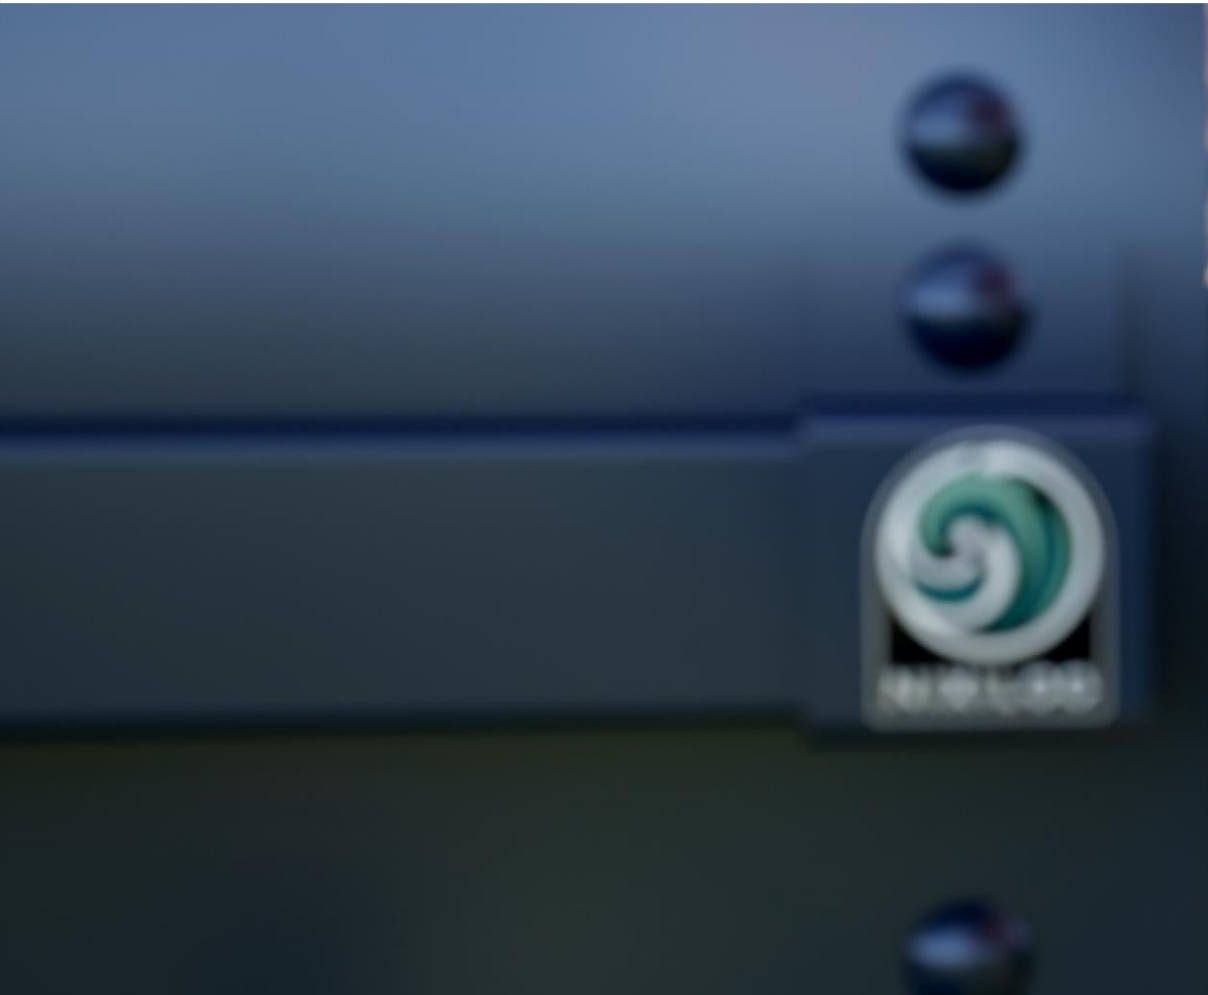

- Custom-made natural fiber bag
- Purchase in packs of 10
- Bucket with lid for transportation

- Annual maintenance through access behind the cabin
- Lock on the opening for security
- Reading window for liquid level

- The sun's rays provide the required energy
- The fan activates and creates an airflow that greatly reduces odors
- The liquid evaporates quickly for a reduction in drainage

THANK YOU !
